ENGINEERED IN INDIA.
DESIGNED FOR BHARAT.

SUSTAINABLE | AESTHETIC | ENVIRONMENTAL

ALVENTANA® System Aluminium is one of the latest Aluminum Door and Window Systems. The knowledge gained from architects, builders, engineers, building research institutes, and fabricators has helped us bring out ALVENTANA® Door and Window Systems to meet tailor-made requirements of individuals for a variety of applications/uses.

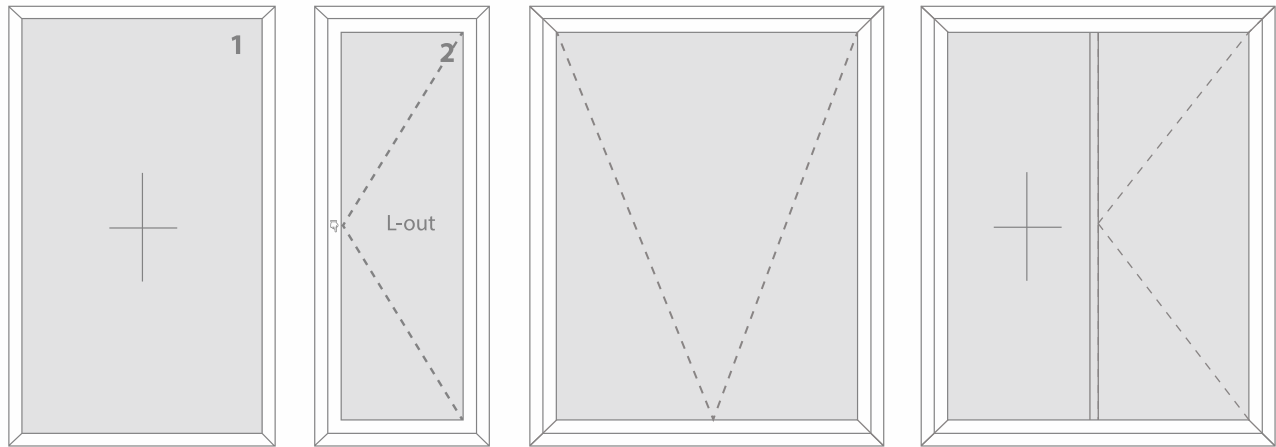

At ALVENTANA®, we are committed to understand the region and environment, pursuing technological innovations to provide customers with a full group of products that suits the region in which they live. Windows and Doors plays an integral role in the overall functionality, comfort and design of homes and buildings, greatly determining the flow of heat and circulation of air through living spaces.

As such, ALVENTANA® offers architectural solutions with top technical & quality standards for built environments with superior aesthetics, comfort, security, protection from harsh weather & simplicity in functionality.

AV40CM

This system is meant for both inward & outward opening windows which provides a clear and unobstructed view. Being a cost-effective system, yet it doesn't compromise in aesthetics, function & durability. EPDM weather seals and properly aligned hardware effectively provide a solid seal against harsh weather conditions when closed.

DESIGN FORMAT CASEMENT/OPENABLE	FRAME DEPTH 40MM	MAX SASH WEIGHT 120 KGS	GLAZING THICKNESS 5-24MM
MULTIPOINT LOCKING AVAILABLE	SERIES EURO 40	FLYSCREEN OPTION PLEATED/SHUTTER	GRILL OPTION AVAILABLE

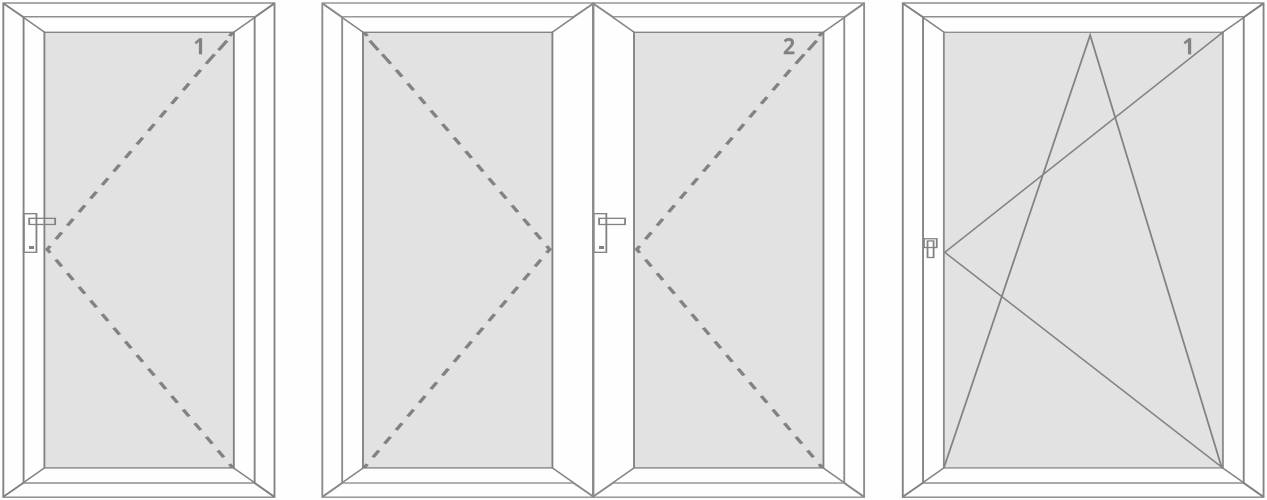

AV50SP

To cater the increasing demand of creative designs these days such as arch, slant, and triangular windows and doors, our special series is introduced in 2021. When it comes to design aesthetics of roman, gothic and similar architecture; arches has been the first preference and with this growing need, we are well-equipped with machineries to fabricate the same without compromising on functionality.

AV50CM

This system is meant for both inward, outward and tilt opening windows and doors which provides an impressive outside appearance with a pleasant living atmosphere inside. As such, unwanted noise, dust, wind and water are kept out and complete peace of mind is taken in.

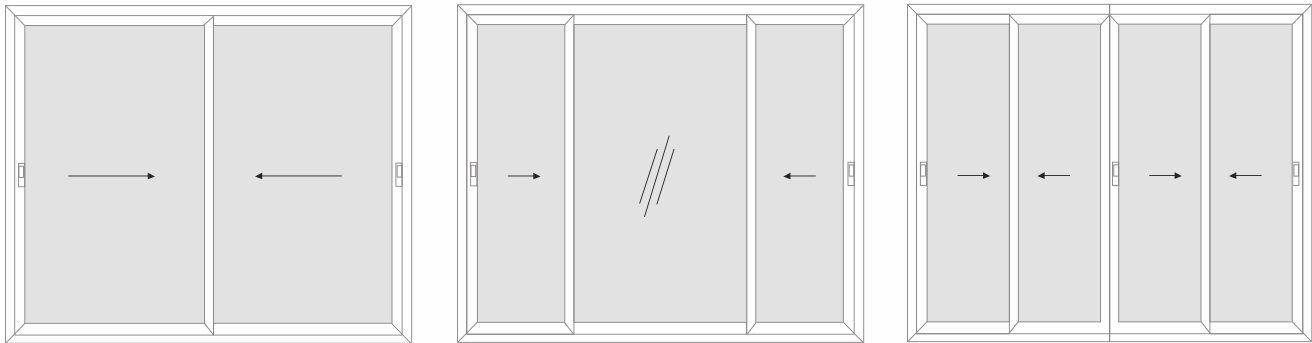

DESIGN FORMAT TILT 'N' TURN / OPENABLE	FRAME DEPTH 50MM	MAX SASH WEIGHT 150 KGS	GLAZING THICKNESS 5-36MM
MULTIPOINT LOCKING AVAILABLE	SERIES EURO	FLYSCREEN OPTION PLEATED/SHUTTER	GRILL OPTION AVAILABLE

AV84SD

This is a sliding system which is designed for wide openings and at the same time allows adjustable ventilation. Benefit of this system is that doesn't require any additional space on either sides, when opened. This system is cost-effective but doesn't compromise in aesthetics, functionality and durability. Moreover, the entry of mosquitoes and other flying insects from outside is also restricted by mesh/screen panels in three rail systems.

AV25IPS

Sliding Windows are well suitable for all exterior situations, however when comes to interiors, bottom profile is one of the biggest barriers. Our Internal Partition Sliding system is well equipped with sustainable hardware which runs on the top and have nothing on the floor. This enables you with seamless movement within the seperated areas. Suitable for seperators for Drawing-Dining, Kitchen-Dining, Drawing-Living, and similar areas where Air conditioning has to be controlled and seperated for privacy. All made with soft close hardware, can also used as doors for dresser area, etc. Design options such as synchronized, telescopic, slide-fold; makes it fully customizable for your needs.

----------------------	---------------------------------	-------------------------	-----------------------

AV25IPO

Sliding system is just not enough for contemporary houses, moreover a durable openable series is introduced to make your house as well as office well seperated when required. When the space for sliding is not enough; choose our Openable series and get it installed with or without frame. One may choose hinges for single side operation or floor machine for both side openigns. These sleek openable doors can be used as framed shower enclosures and relevant hardware such as towel rod, etc.

GLASS OPTION 10MM OR FLUTED	MAXIMUM WEIGHT 80 KGS	HARDWARE COLOR OPTIONS SAME AS PROFILE	LOCKING OPTION KNOB OR KEY LOCK	COLOR OPTIONS MILL/EV FINISH, POWDER COATED, ANODIZED, WOODEN

ROLE TOWARDS THE ENVIRONMENT

ALVENTANA® System Aluminium desires to help accelerate the adoption of best building practices that result in energy-efficient, healthier and environmentally sustainable buildings. Our system designing approach tends to support both builders and consumers with environmentally friendly building methods, with the view to reduce the impact on our environment.

Energy-efficient windows minimize the need for heating, cooling, and artificial lighting by using some combination of window glazes, multiple panes, tightly-sealed edges, insulated glasses, and gas fills.

The success of energy-efficient features varies based on regional climate, direction of windows, and how windows are fit into the overall home design, so consumers should sensibly consider which types of windows and doors best fit their needs.
